EDUCATION

- **NFC Institute of Engineering & Technology** Multan, Pakistan
Bachelor of Science in Computer Science | CGPA: 3.78/4.0 Sept 2019 – Aug 2023

EXPERIENCE

- **HATTRICK SOLUTION** Multan, Pakistan
Technical Lead Apr 2024 – Present
 - : Leading cross-functional development teams and mentoring engineers using agile workflows.
 - : Managing CI/CD pipelines using GitHub Actions for smooth and automated deployments.
 - : Conducting code reviews and maintaining clean architecture standards.
 - : Collaborating with management on product roadmaps, architecture decisions, and releases.
- **FISTIX** Multan, Pakistan
Junior Full Stack Developer → Senior Full Stack Developer Feb 2023 – Mar 2024
 - : Started as a Junior Developer focusing on API integration, bug fixes, and Shopify storefront enhancements.
 - : Promoted to Senior Developer for consistently delivering high-impact features and leading sprints.
 - : Developed scalable backend services using Node.js, Express, and Prisma.
 - : Built Shopify-integrated e-commerce platforms with Stripe and GraphQL APIs.
 - : Optimized React.js UIs for performance and mentored junior teammates.
 - : Collaborated with product managers to align technical execution with business goals.
- **DATALINES** Multan, Pakistan
Junior Web & Mobile Developer Jan 2022 – Jan 2023
 - : Developed Flutter mobile apps with Firebase and custom REST APIs.
 - : Contributed to NFT marketplace development and blockchain smart contract integration.
 - : Managed Play Store and App Store deployments and updates.
 - : Collaborated with senior developers to deliver polished releases.
- **THE MARS ART & DESIGN SOLUTIONS** Multan, Pakistan
Intern Developer Sep 2021 – Dec 2021
 - : Worked on Laravel-based web applications focusing on UI integration and API connectivity.
 - : Assisted with Stripe payment flows and front-end component development.
 - : Gained foundational experience in Git, teamwork, and production workflows.

TECHNICAL SKILLS

- **Languages & Frameworks::** JavaScript (ES6+) , TypeScript , Solidity , Python , PHP (Laravel) , React.js , Next.js , Node.js , Express.js , Dart (Flutter)
- **DevOps::** Docker , CI/CD Pipelines , Nginx , PM2 , AWS (EC2, Route 53) , VPS Deployment , GitHub Actions , WHM / cPanel / hPanel , Application Monitoring & Performance Tuning
- **Blockchain::** Smart Contracts (Solidity) , ERC20 , ERC721 / ERC721A / ERC4907 , NFT Ecosystems , IPFS Integration , Tokenomics Design , DApp Architecture , Web3 Integrations
- **Databases::** MySQL , PostgreSQL , MongoDB , ORM Models (Prisma, Eloquent) , Query Optimization , Database Schema Design
- **Third-Party APIs & Integrations::** Shopify , Stripe , PayPal , Google Pub/Sub , REST & GraphQL APIs , Webhooks , Payment Gateways , Real-time Event Systems
- **Tools & Platforms::** Git & GitHub , Postman , Slack , Discord , ClickUp , Agile Workflows , API Testing & Documentation
- **Core Programming Concepts::** Object-Oriented Programming (OOP) , Design Patterns , Clean Code Architecture , RESTful API Design , Asynchronous Programming
- **Specializations::** Full-Stack Web Development , Backend Architecture , API & Microservice Design , Cross-Platform App Development (Flutter) , Database Optimization , Project Management , Scalable System Design

NOTABLE PROJECTS

- **MerchLink – Shopify Sales Channel App:** Developed a collaborative commerce platform allowing partner stores to sell each other's products with automated commissions. Integrated Shopify APIs, secure authentication, and real-time order tracking.
- **Autoplus – Automobile Service App:** Built a cross-platform app connecting car owners with service specialists. Developed using Flutter (Dart) with Node.js and Laravel APIs, supporting bookings, GPS tracking, and payment workflows.
- **Decentralized Parlay & Prediction Platform:** Created a Web3 betting and prediction platform using Solidity smart contracts with ERC20/721 tokens, LayerZero bridging, and Polymarket-style governance.
- **NFT Marketplace & Token Bridge:** Built NFT marketplaces and cross-chain token bridges on Ethereum and Layer-2 networks. Designed gas-efficient contracts (ERC20, ERC721, ERC4907) and integrated IPFS for metadata storage.
